RAPID to start commercial operations in 4Q19 – Lim Guan Eng

KUALA LUMPUR: The Refinery and Petrochemical Integrated Development (RAPID) project is set to begin commercial operations in the fourth quarter of this year (4Q19), said Finance Minister Lim Guan Eng yesterday.

He said the project would turn Malaysia into a net exporter of refined fuels for the first time

since 2008.

This (Petronas and Saudi Aramco) joint venture marks a historic partnership between two of the world's most successful national oil companies.

The collaboration brings together vast resources, technologies, experience, expertise and commercial

presence, much to the benefit of both companies and both countries," Lim said in his opening speech at the Asian Oil, Gas and Petrochemical Engineering Exhibition (OGA) here.

He said Malaysia's oil and gas sector is moving up the value chain to protect the country from excessive volatility seen in

the upstream business segment.

"As Malaysia moves up the value chain in the oil and gas sector, it is also important to remember that the country is a diversified economy.

In 2018, mining accounted for about eight per cent of the country's gross domestic product, while manufacturing contributed 22 per cent and

services 57 per cent," said Lim.

He said the country is also benefiting from the ongoing trade war between China and the US through business relocations as well as trade and investment diversions.

The reorientation of the global supply chain and Malaysia's competitiveness saw the country's approved foreign

direct investment (FDI) in the manufacturing sector surging 127 per cent to RM20.2 billion in Q1 2019 from RM8.9 billion a year ago, said Lim.

He added that the total approved FDI across all sectors in 1Q19 also rose 73.4 per cent year-on-year to RM29.3 billion from RM16.9 billion previously. — Bernama
