

The 17th Asian Oil, Gas & Petrochemical Engineering Exhibition

18 - 20 JUNE 2019

Kuala Lumpur Convention Centre
Malaysia

THE REGION'S
NO.1
OIL & GAS SHOW

E-SHOW DAILY

DAY 2 19 JUNE 2019

New Ways of Innovation with Technip

Technip aims to share their new ways of working that enables improved and sustainable results for their clients, constantly challenging themselves as well as the practices of our industry, reinventing technology and approach to projects, innovating end-to-end for greater efficiency. Their vision is to enhance the performance of the world's energy industry. We will showcase our company's integrated expertise and comprehensive solutions, from subsea, onshore/offshore and surface. Technip offers their clients a unique expertise, world class project execution from concept to delivery, and technology knowledge in Liquefied Natural Gas, Ethylene, Petrochemicals, Oil Refining, Fixed and Floating Platforms. Visitors at the booth will get to discover how Technip creates sustainable change and transform their client's project economics. From iFEED™, iEPCI™ to iLOF™ and Subsea 2.0, they are introducing a revolutionary product platform that makes subsea projects simpler, leaner and smarter. For Surface Technologies, they will present solutions for drilling, completion, production, pressure control, midstream and downstream transportation, all in the pursuit of delivering today's

projects and innovating tomorrow's challenges. Visitors can expect solutions that help them increase up-time and decrease risk, and measurement solutions that provide the most accurate and reliable performance for mission-critical inventory transactions.

Drop by their booth for daily sessions of their 3D Subsea Immersion theatre experience, as well as an Onshore/Offshore VR experience.

WHAT'S ON TODAY!

20 JUNE 2019

- ▶ **OGA Innovation Awards Pitching Session**
10.00am - 1.00pm
Hospitality Lounge, Hall 1
(Mezzanine Floor)
- ▶ **Technical Talks & Presentation by Exhibitors**
11.00am - 4.00pm
Kiosk Hall 2
- ▶ **Business Matching - B2B (Exhibitors/VIP and Trade Visitors)**
11.00am - 4.00pm
Rooms 304 & 305 - Hall 9A (Level 3)
- ▶ **OGA Innovation Awards Presentation**
2.30pm
Hospitality Lounge, Hall 4
(Mezzanine Floor)

Germany Pavilion Host

German Pavilion offering a professional brokerage service to help establish contacts with German companies and comprehensive information on Germany as an important business location. OGA offers a great number of opportunities to find new business partners.

Going Beyond Boundaries® with UMW

UMW is one of the leading industrial enterprises with diverse and global interests in the automotive, equipment, manufacturing and engineering industries. The UMW Group has expanded beyond Malaysian shores. UMW joins this year OGA to create awareness for their products and services with the spotlight on their customised air and gas compressor packages, customised diesel and gas engine generator packages, oil spill response equipment, MRO capabilities and EPC downstream capabilities as well as the customised compression and power generation packages compliance to Oil & Gas hazardous area standards, fully package in the country, local repair and maintenance facilities.

Future of Engineering with ProtankGrüp

ProtankGrüp consist of various units; every business unit has its own specialisation in a particular business line. Apart from airport markets, the business unit specialises in aviation refuelling line in both ground and air-refuelling. The key specialisation includes offshore & naval markets. The business unit that specialise in the maritime industry serve the naval markets as for the "Integrated Platform Management Systems for the Malaysian Royal Fleet." Another business focuses on the liquid packaging segment serves clients for both the upstream and downstream of the Oil & Gas segment. In particular for the packaging of Dangerous Goods Cargo for the offshore use. Most of the products are designed and engineered in-house. Protankgrüp joins OGA 2019 to promote their latest products and services such as the grouping of boutique fluid specialist companies that will be showcasing its Aviation Refuelling Systems and Engineered Tanks. In offshore and naval aviation, they design and build aviation fuelling packages used on board FPSOs, offshore platforms, and warships. They provide top-to-tail services based on their clients requirements. Protankgrüp takes great pride in being able to use its knowledge and expertise in the Oil & Gas field to provide customers with a total solution for all applications from system design through customer training. Their after-sales service range from the support of Field Service Engineers for maintenance and repairs that includes the supply of spares.

Exploring Innovation with T7 Global

The Malaysian Government has contributed significantly towards policies and macro-economic implementations to achieve long-term success for the Oil & Gas industry. As a key O&G player in Malaysia, T7 Global has a responsibility to take the lead in the industry. From previous participation in OGA, T7 Global hopes to promote awareness to the local and international players that Malaysia is a leading O&G country, with the industry being an important contributor to the country's economy and sovereignty. T7 will be showcasing numerous products and services from their group and partners for OGA 2019. Some highlights of the products include Mobile Offshore production unit model, On-site gas generator system model, Remote operated underwater vehicle model, Diving equipment, Valves from Oliver Valves, Oliver Valvetek and Oliver Twinsafe, Safety systems and process instrumentation. T7 Subsea provides Offshore Platform Maintenance & Inspection Services using Micro ROV System which is deployable directly from the Platform with a minimal footprint. Overall, this would be cost effective compared to using a conventional ROV with a support vessel. Wenmax offers a range of products and services along with joint professional consultation to the end user. A technical support team is responsible to provide after-sales services and routine maintenance to ensure all expectations are met.

"The O&G sector has always played a significant role in Malaysia's economic growth. Moving forward, this is not expected to change. The OGA 2019 thus serves as a great opportunity for local O&G players to bound together in the interest of strengthening the country's O&G sector - showcasing potential through demonstrating technological capabilities on top of gathering market intelligence and building up business relationships with potential clients."

- Tan Kay Zhuin, Group Chief Operating Officer.

EMERGING EPC - Target To Increase Its Brand Awareness

Emerging EPC's One-Stop Solution and decades-long extensive knowledge field experience help provides improvement of Equipment Efficiency & Optimisation, while maintaining strategic control of the Operation Expenditure. Their proven track record includes successful on-time delivery, testing and commissioning. Built on a foundation of integrity, competency, value creation & HSE-compliant offerings, Emerging EPC has developed steady growth and recognition over the years within the Oil & Gas industry in SEA. We hope that with the high quality products, good reputation and after-sales service

business culture, Emerging EPC's good name will gradually increase and be recognised, supported by more Oil & Gas operators, which will help increase our business opportunity in the regional market, also creating more job opportunities and technical advancement for engineers in Malaysia. During OGA 2019, we target to provide new offshore services, maintenance, repair and retrofit for Southeast Asia Oil & Gas industry Equipment packages that includes Reciprocating Gas Compressor, Instrument Air Compressor and Process Filtration & Separation.

"Since 2013, we have participated in OGA and this is our 4th year exhibiting. It is through OGA, we have expanded our business into Vietnam and Thailand in supplying and providing Services & Repair for Rotating Equipment. Within 6 months of participation, Emerging EPC successfully clinched a major award in Vietnam." - Karen Eio, General Manager of Emerging EPC Sdn Bhd.

Quality Attracts Quality With Unit Concept

Growth is testimony to the quality engineering solutions and products that Unit Concept continually deliver to their customers. With beliefs of the saying that quality attracts quality; this applies equally to the people who work with Unit Concept, their partnership with top global brands, and their astute customers throughout the years. Unit Concept joins OGA with the objective of the show being as part of their company's marketing strategy and Unit Concept specialises in providing Engineering, Procurement, Installation and Commissioning (EPIC) services to the Oil & Gas industry locally and globally both in Electrical and Instrumentation. We have expanded our business to include trading and services, specialising in engineering and system integration. Presently, Unit Concept is also an agent for many well-known, international brands of Oil & Gas related products.

ALIOGAZ KUKUH - Delivering Engineered Excellence in Procurement

OGA 2019 marks the 4 times we have participated as an exhibitor since we took over the management. Our objectives had remained unchanged. We would communicate the company's competencies in delivering engineered excellence of flow controls, filtration and process engineering products and services, showcase our partners products and services whom are renowned manufacturers, of their new product range; existing products with improved design & features; and factory's enhanced efficient delivery systems aim to satisfy the customers and end-users. On top of that, we will be constantly looking out for synergistic new partners. At OGA 2019, we particularly would like to highlight below items:

- Valves used on Piping, Pipeline/Subsea, Well-head and Instrumentation
- Filtration Systems such as Strainers and Filters
- Specialty Piping Systems
- SCADA, Programmable Logic Controllers (PLC), Fire and Gas Protection, LNG ISO Tanks

"To be a leading S.E.A based company, recognised for DELIVERING ENGINEERED EXCELLENCE in Procurement, Consultancy and Servicing of Flow Controls, Filtration and Process Engineering products to the Oil & Gas and related industries, through performance, professionalism and partnership with renowned manufacturers, to achieve customer satisfaction and sustainable growth."
- Mr. Terrance Wong, General Manager.

A New Look at Innovation with Rivil

Oil & Gas is one of the industries that Rivil can help get more cost-efficient source of drinking water supply and a more reliable water security for offshore operations. Through direct feedback from visitors during OGA2019, Rivil's objective is to understand deeper on drinking water challenges that

the industry faces and educate the industry on our Atmospheric Water Generator (AWG) technology and how it can help improve and solve the water challenges in Oil & Gas industry. Rivil will be having their 50 liter/day AWG machine, where visitors can see how drinkable water is created directly from the air, and they will offer free AWG drinks for visitors to try for themselves. Seeing is believing. Rivil's AWG technology creates drinkable water from humidity in the air via condensation process. With Malaysia's average Relative Humidity (RH) at around 81%, we have an alternative source of water in abundance where AWG technology provides access to on-demand source of water anywhere, anytime. At places with no access to tap water like offshore, this provides the most reliable water security for drinking water with lower cost per liter compared to plastic bottle water (mainly due to no logistical cost needed to produce drinking water).

"The work and support from the Organiser is excellent and has helped us to have the best set up to promote our solutions to the Oil & Gas industry effectively." - Faizal Akmal, CEO, Rivil Sdn Bhd.

TRK Valves - A Fast-Growing Indonesian Ball-Valves Manufacturer in the Growing Asia Rim Pacific Region

PT. TEKNOLOGI REKAYASA KATUP (TRK Valves), is a company based in Jakarta (Indonesia), focused on the manufacturing of special engineered Ball and Double Block & Bleed Valves, floating and trunnion mounted, both manual and actuated - SDV, ESDV, BV and MOV - entire API 6D range up to 36", ANSI 150# to 2500#.

TRK Valves competitive advantage is an excellent product, engineered-to-order, delivered on time (even with fast-track deliveries), at competitive market price, with a guaranteed global after-sales service. This year, TRK will participate as an exhibitor at OGA 2019, a platform of the utmost importance to understand the opportunities in this dynamic market, being the Region's No. 1 Oil & Gas exhibition. Taking part at OGA 2019 will be an important marketing instrument for TRK Valves because there's a great opportunity to better understand the market scenario in the growing Asia Rim Pacific region and to share ideas on how to cooperate for a successful business in this promising area. During the event, TRK Valves aims at consolidating its position and celebrating with its partners and friends its fast developments in the Oil & Gas market. TRK is growing fast by taking advantage of favorable political and economic situation as Mr. Barletta, TRK Business Development Director, says: "The goal of TRK is to build a reputation via the achievement of delivering on time high quality ball valves fit for the required high-end applications. Thanks to the acquired expertise and the Business Development Office set up in Milan (Italy), TRK has escaped the boarders of the domestic market. TRK is a global leading organisation that cultivates cutting-edge expertise at the product-engineering level, maintaining a local presence to meet End-User's expectations and needs."
