

Al Kahfi - Exhibiting Latest Solution To Logistic Support Requirement

To strengthen their presence in Oil & Gas industry and market, ALKAHFI hoping to reach out and improve awareness of the company's capability to bring significant contribution to the national Oil & Gas industry. We are also looking forward to meet prospect and existing client who shares comment and feedback so that we could improve our practices to suit their need effectively. During OGA 2019, we look forward to share our solutions to their logistics support requirement by exhibiting our latest executive class Fast Crew Boat model 30 knots @100% MCR, Flex-42X which is now available with Hydraulic Motion Compensated Gangway for safe and efficient personnel transfer. We also take this opportunity to highlight the Seacor Cougar, first Catamaran crew boat being utilised in Malaysia.

"We wanted to demonstrate ALKAHFI's business capability and OGA 2019 is one of the best platform to do so. Our previous participation was a success where we were able to emphasize our readiness to enter into a strategic alliance and partnership to provide the most efficient, economic and reliable solutions with good engineering and Oil & Gas industry practices. It is also a good platform to promote HSE awareness, new technologies and good industrial practices and cultures. Our ambitions for a world-class operation can only be achieved hand-in-hand with further progress in the HSE arena, and continuing to set the bar higher." - CEO, Mohd Nazri bin Mohd Zain.

Raising The Bar Of Quality Lifting Gear With Top Slings Trading

Top Slings Trading is a leading supplier and certified warehousing facility in Selangor, Malaysia. A stockist for a wide range of wire ropes, chain blocks, shackles, lifting chain, stainless steel rigging and all kinds of lifting gear. Top Slings Trading joins this year's OGA show to understand the current market trends and consumer preferences toward current lifting equipment and accessories. Showcasing their lifting equipment and accessories that provide higher value than current market options, the ATEX product, a lifting equipment that's allowed in an environment with an explosive atmosphere. Including lifting sets with DNV 2.7-1. Approval and a Yoke's lifting point - rotatable lifting point. The products are certified by major international authorities such as Deutsche Gesetzliche Unfallversicherung (DGUV), ABS, API, and DNV, which assures strict production facility with quality control in every manufacturing stages and recognition in Oil & Gas sector.

"OGA 2019 is an excellent platform for the players in the Oil & Gas industry and underlying industries, such as heavy lifting to showcase featured products and create business opportunities. As a growing company, it is important for us to keep up with the market and planned ahead. This makes OGA 2019 a perfect opportunity to collect information about the current market trend and latest technologies in the Oil & Gas sector, providing us a good amount of data to our expansion strategy in the Oil & Gas sector." - Sam Ng, Business Development & Marketing Manager.

Micropak - Innovator In Visual Flame Detection

Micropack have a commitment to provide the highest quality flame detection products and innovation in F&G design techniques and software solutions in South East Asia and we look to provide the highest quality local support. OGA is a great opportunity to showcase our products and services while meeting our existing and prospective customers in person to discuss how we can support them. During the event, we will be showcasing our unique range of flame detectors and our technical services in Fire and Gas (F&G) Detection design including 3D F&G Mapping. Our 3D F&G Mapping solutions allow projects to optimise the number of devices required while meeting the design standards, while our range of flame detection products with superior performance allows the operator to achieve a greater coverage with fewer devices. Our vastly increased false alarm immunity also means spurious trips and their associated costs are greatly reduced during operation.

"In a challenging period in Oil & Gas, optimising new project costs and keeping older facilities running is crucial. At Micropack we provide Fire and Gas Detection solutions to meet these requirements and OGA provides us a great opportunity to speak with those who have had experiences of these problems before, and also to investigate collaboration with similar like-minded professionals in order to move the industry forward." - Eliot Sizeland, Director of Sales Micropack Engineering (Ltd).

Gastron - GTF-1100T Flame Detector

GTF-1100T Flame Detector has been developed to prevent large-scale accidents beforehand by early detection of fire that can occur in all industry fields. It can be installed in all industry fields where fire can occur, and is installed in the area with a risk of fire for constant, continuous detection.

By insertion of 3 types of high-sensitivity sensors capable of sensing infrared wavelength band that cannot be discerned with naked eyes upon fire, it was made for detect fire quickly with minimization of false alarms due to interference factors.

Situations are displayed by LED installed inside the product, and 0-20mA Analog Current Output, RS-485 communication Signal, Alarm Relay, Trouble Relay contact Signal are outputted.

EFTECH Group of Companies Showcases New Business Portfolio and New Partnership

EFTECH has always been supporting & participating in OGA since the past few years. The main objectives are to showcase Eftech's new and existing services, capabilities and technology. For the past few years, EFTECH Group of Companies have evolved, diversified and expanded more than it has ever been since the day it was incorporated. And for this reason, we trust that OGA 2019 can become a good platform for us to create awareness and promote our newly ventured business to a broader group that may have a little or minimal knowledge about us. On top of highlighting our core products & services, we would like to showcase a new technology that we have just ventured in. EFTECH has recently formed an exclusive partnership with a Norwegian Company; Connector Subsea Solution (CSS), whose experience and expertise is a key player in Subsea Operations related to Engineering, Repairs & Deepwater Projects.

"OGA will be a strategic platform for a company like us to spread the news on our new venture and collaboration. For the record, Eftech has established its presence into the Australian market, having its own purpose built facilities in Jandakot, Perth, Western Australia since 2015."
- Dato Mahathir Samat, Executive Chairman and Group CEO.

Offering Proactive And Complete Approach Services

At OGA 2019, we will be highlighting high-end products ranging from electrical to mechanical to instrumentation equipment, of which we are the sole and exclusive agent in Malaysia. But more importantly, visitors to our booth can expect to see our capabilities in providing customised Zone 2 Air Compressors, Retrofitting of Aging Electrical Chargers and State of the Art Security Management Systems. The products that we represent are supplied by the leading manufacturers in the world and we provide thorough and full after-sales-service support for all the products that we carry. We also provide customised solutions and we believe that, with the engineering knowledge and service support that we have, we offer a more proactive and complete approach compared to others who are more into trading products with no after-sales-support being provided.

"OGA has always been the premier Oil & Gas exhibition in the region and due to this, we have consecutively participated since the year 2007. We hope OGA 2019 will be as successful as the previous ones if not better, and we look forward to a good exhibition ahead!" - KC Saravanan, Technical Manager, Star Kris Services Sdn Bhd.
